testXpert[®] Analytics - The new platform for test and machine data

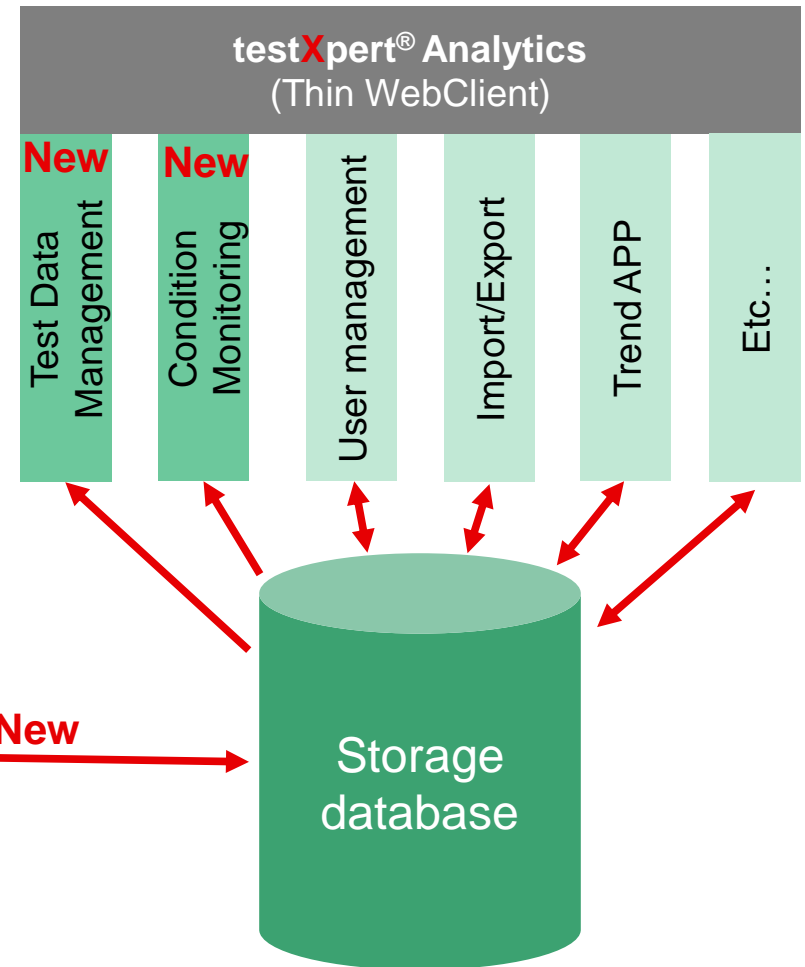

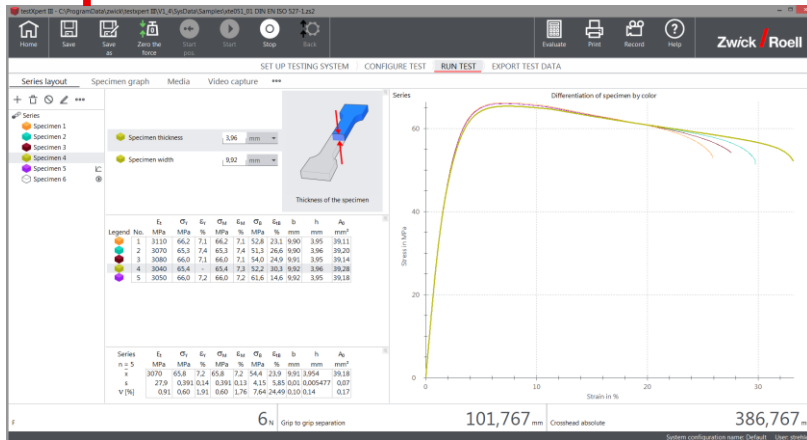

Intelligent software features that go far beyond just testing, to guarantee reliable test results.

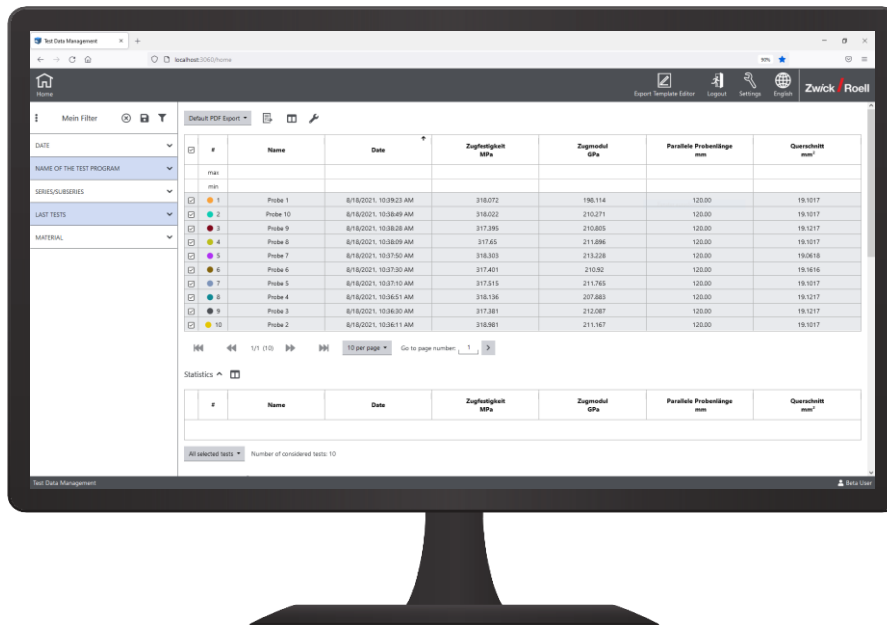

Since testXpert III V1.5, all test and machine data can be stored in a database for further analysis.

Test Series as
zs2-Files

Test Data Management as a new possibility to analyze all your test data just via a web browser, at any time and from anywhere.

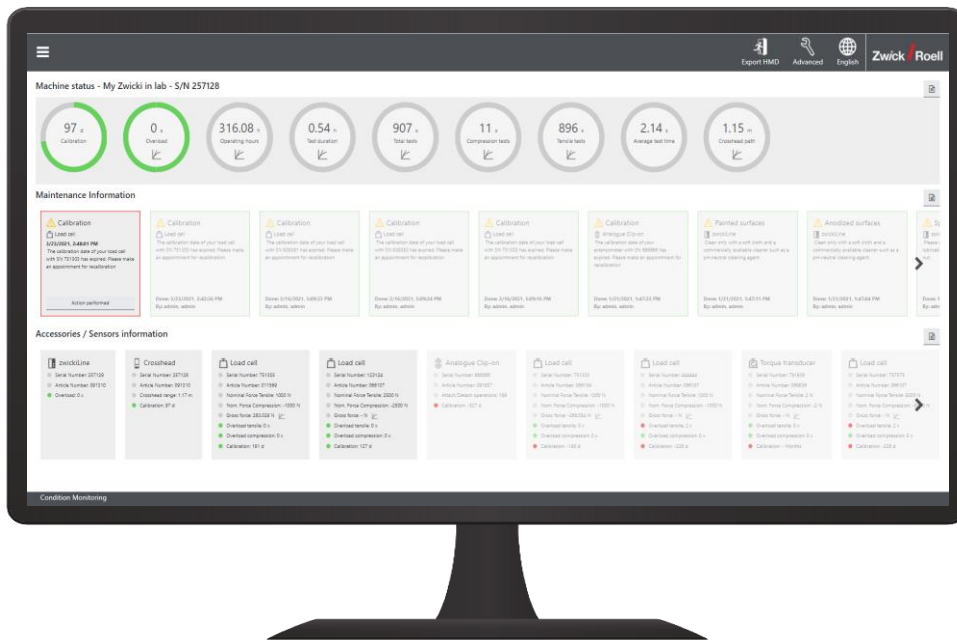

- Easy access to test data independent of testXpert
- Compilation of test data from different test series
- Search using simple filter criteria
- Direct test report output
- Traceable, scalable and secure data management
- Long term statistics over several test series and testing machines
